

Challenges:

- Increasing Student Achievement
- Finding the right technology
- Engaging your Students
- Stretching Limited Resources

The Solution:

AVRover is the brand of portable education systems, specifically designed to increase student achievement. Our complete educational technology solutions service K-12 and higher education. Our state of the art training systems are also used by the government and the defense industry.

AVRover

A Classroom's Best Friend

What we do

- **Design** user-friendly systems to increase student achievement
- **Equip** teachers and students with the most powerful educational technology
- **Provide** easy to implement, flexible, affordable solutions

The logo for AVRover, with 'AV' in black and 'Rover' in red, both in a bold, sans-serif font.

Benefits

Mobile

Wheel your AVRover into place and you have a classroom anywhere

Easy to use

No installation!
Every AVRover ships fully assembled and ready to use

Flexible

Adjust your image height, size and location
Teach one to many, one to a few or one-to-one

Secure

Your investment is safe even when in use
Equipment is secure inside your AVRover

Shareable Resource

Sharing your technology between classrooms saves money

Future-Proof

Our units are designed to be upgraded with any technology anytime

Higher Achievement

Proven to increase test scores and retention by as much as 33%*

Engage Students

Many products claim to increase student engagement, AVRover actually delivers

Low Maintenance

Reliable, rugged to the core and easy to upgrade

Sharing Saves

Place technology in the hands of more students and faculty

Engage, Excite and Enlighten your students with AVRover.

"AVRover is AWESOME. We have 5 in our schools and everyone agrees that they are one of the most useful pieces of technology!"

*Mathew Pietrzak Director of Technology
Diocese of Wichita, KS*

"Using the AVRover this year has been GREAT! Let's be honest, keeping up with our students' development in technology is a difficult task, but the Rover allowed me to keep my curriculum relevant and exciting for my students. With the 3-D boom the initial "wow" factor immediately caught their attention and my class quickly became the "buzz" around school. The really amazing part though was watching the students' engagement with the programs. The clips were outstanding because they put lessons to life in a way that text books and traditional movies could not. Students could truly see what their units coming to life right before their eyes. The AVRover was an outstanding addition, increasing student understanding in many various topics!!"

*Matt Walker, MEd, BBA, EMT-B Medical Lead Teacher
Darnell-Cookman Middle/High School Jacksonville, FL*

"I have no doubt that this piece of equipment is a necessity for the 21st century classroom.

Our Science and Mathematics teachers are fighting to use the 3DAVRover. Our teachers cite ease of use with all academic levels, authentic engagement, fun, relevant, and visually appealing as some of the many benefits of using the device. They all agree that it is a great tool for teaching and reinforcing concepts visually."

*Horace Hamm, Principal
McNichol Middle Magnet School-Broward County, FL*

Need a different solution? We'll make it for you.

AVRover Support

From our industry leading 5 year warranty to superior technical support, we work with you for the life of your AVRover. You won't be faced with a call center or exorbitant training fees either. Each AVRover system includes a personalized webinar training session on your new best friend.

AVRover History

AVRover is leading the education and training industries in creating the highest quality, easiest to use, and most secure, portable educational solutions.

We pioneered the revolutionary concept of creating mobile classroom solutions. Our focus has always been to develop the most advanced, comprehensive, and easy-to-use classroom technology solutions for education and training.

AVRover equips teachers and students with easy to use systems that harness the full potential of powerful educational technology. Each AVRover is specifically designed to increase student achievement. We are passionate about providing easy to implement, flexible in application and surprisingly affordable educational technology solutions.

AVRover Green Design & Manufacturing

AVRover is committed to the pursuit of Green Manufacturing and Sustainability, both in the design and the creation of our products.

All AVRover products are designed and manufactured in the United States of America.
